

TEARS OF WOMEN

1. I think of the story from the past, passion starts in my heart, it is painful; when domestic violence happens in the family it is very bad; this is created by men with no passion and who hit their wives, and the children also suffer from this act.
2. Stop the act of threatening and oppressing women; women are suffering from rape that happens everywhere and everyday; some rape their own children and some others rape children who are under age (under 18 years old); this is very cruel and bad; so could you (man) please tell me what you think of women?
3. Oh! Mother I am exhausted both emotionally and physically and I have no free time; I work even during the holidays because our families are very poor; I feel pity and I am really want to help you mother; but I am very young and this is the age that I have to study.
4. I engage in this work because mom and dad have broken up; I have to stop studying and seek a job to help the family; I enter into factory work without any free time; they ask us to work overtime at night, sometimes until the next morning.
5. Working hours are different from the stated law; although they know that it is wrong they ignore this; they exploit our labour everyday; because women dare not speak out as we are afraid that we will lose our jobs.
