

## The suffering of workers

1. Such is the life of workers, we are poor people from rural areas, we never have any free time because we always work. Overtime work keeps us busy because we need this money to pay off our families debts.
2. We work from morning till night with extra overtime, if we do not complete the orders we have to continue working till the next morning. We are sleepy, we can't eat anything and we become sick. Who knows about this situation and can help me?

Ref. Sometimes when we finish overtime and are walking home along the road, the vicious gangsters harass and follow us. We worry constantly and don't know how to protect ourselves.

3. Our lives are a struggle without end, though we are faced with many difficulties. It is because our economy is poor as are our families. We have to be brave and speak-out.
