

Strapped by the credit program

- I. Lies; lies. They always trick the poor
They boast that they are good people and they honestly help
- II. The credit program claims that it will eradicate poverty and
develop the district and village
- III. The people don't know so they think it is true
They believe the lies and they fall into a hole
- IV. We hate the people that lie to us
They try to destabilize us
- V. When the credit program comes to a place, it will become poor
Because it is bad and it doesn't help us
- VI. We don't need the credit program to develop
Don't say that we default on our loans
Because you tricked me
It wasn't a loan, so there's no pay back
