

YOU MUST STRUGGLE FOR YOUR LIFE

- I. Factory already closed....Oh what can I do? Oh my family.....face a lot of worries.
- II. Rainy season is coming...Oh father, mother... Where is money to grow rice? We need to spend a lot of money.
- III. Seed and chemical fertilizer are expensive....and soil is infertile. Oh.... I have to think.....to find a new job.
- IV. Garment work is now becoming harder and the wage is very low. The cost of necessities are increasingly expensive....we have to pay double.
- V. New workers who are employed, after one year still do not become permanent. No one helps to think, how do we solve our problems?
- VI. The work allocation is overloaded, Permanent workers are shifted to be new workers and for the newly opened factory, the boss power to suppress workers.

It is time, we, the workers, stand up and demand good working conditions for all.
