

## THE VOICE OF THE PEOPLE LIVING WITH HIV/AIDS

- I- Our heart is sad. Our lives no more meaning because HIV is taking everything from us.
  
- II- What will I do? Our families depend on us to earn money to sustain them, to build a bright future in society.
  
- R- Where is the promise to help poor people? You are just thinking about making a profit and don't care about the sorrows and difficulties of other people, dying because we don't have medicine to help.
  
- III- I sing this song to the companies that produce ARV (anti-retroviral). Please give the medicine to us for free.
